

Tomina Consulting provides a wide variety of services that can be tailored to fit your individual business and budget needs. Our customers find that they save money by proactively maintaining their network systems instead of paying us to recover from a network crash. We don't require any contracts and work on a month to month basis.

Our services include:

- Server installation and support
- Network managed services
- Data backup and recovery
- Remote Support
- Computer and network security
- Anti-virus and malware solutions
- Patch management
- System imaging
- Software deployment/updates
- System repair, diagnostics and upgrades
- Network design
- Many more

We now offer complete integration of Mac and Windows systems in your office as well as supporting all Mac devices.

When you hire **Tomina Consulting** for **Proactive Maintenance**, some of the services that will be performed on your premises will include but are not limited to:

- System inventory and computer audits
- Security audits
- Patch management, security updates and software updates
- System event monitoring
- System optimizing
- Performance monitoring
- Test backups and perform test restores
- Confirm antivirus/anti-spam/malware software is up to date
- Perform any repairs needed as time permits

Our hourly rate is \$95 per hour or if you need us for the whole day, our day rate is \$600. Call us today for a free consultation.

Innovative. Personal. Reliable.
